

Exercise: Create a Work Item

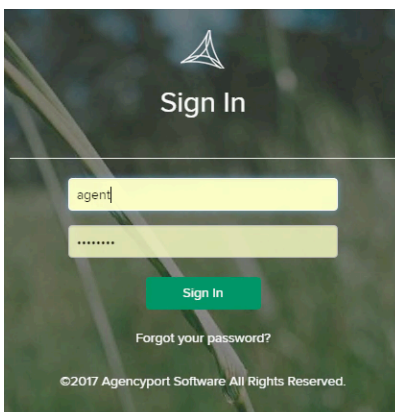

The purpose of this lab is to (1) make sure that we're able to get the application running as well as (2) to seed a Workers' Comp WorkItem with data for use throughout this course.

Steps

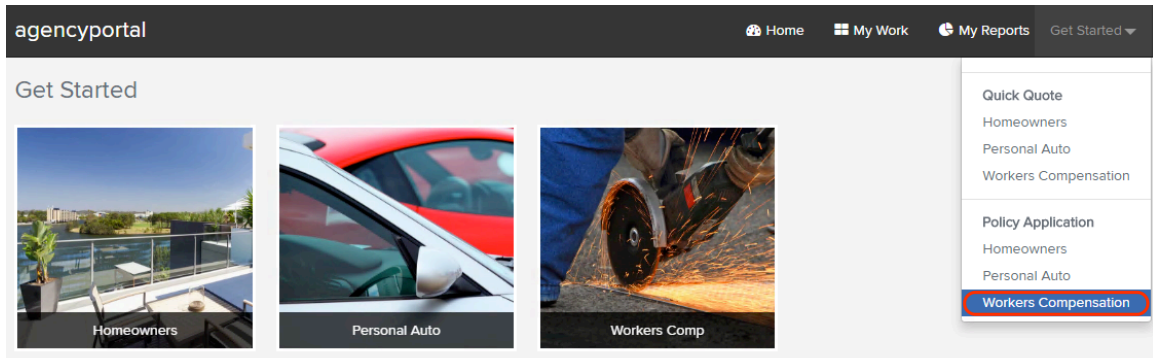

1. Open Eclipse and start the Tomcat server by right clicking on the Tomcat server on the "Servers" tab and click "Start"

2. Open Chrome and go to AgencyPortal:
<http://localhost:9999/APSDKTrainingPortal/DisplayLogonForm>
3. Log in with agent / password

4. Create a new **WorkersComp Full Quote Transaction** by clicking either one of the circled areas below:

5. Fill in the required fields (the ones marked with an asterisk next to them) and click “Continue”

* Denotes Required Fields

For help with a specific field or question, click on the question mark icon.
